## PROFILE

---

I'm **Abdul**, a passionate and solutions-driven full-stack developer with a strong reputation for problem-solving and thinking outside the box. I thrive on tackling challenges creatively and am constantly seeking opportunities to advance my skills and deliver high-impact results.

With a solid foundation in both front-end and back-end technologies, I've built scalable web applications, integrated third-party services, and contributed to cross-functional teams. My consistent drive for improvement has earned me strong recommendations from peers and mentors, and my work has often stood out for its performance, user experience, and technical depth.

I bring a mindset of continuous learning, precision, and ownership — always aiming to build clean, maintainable, and efficient solutions that make a difference.

## EDUCATION

---

**Software Engineering**, *Babcock University* present  
ilesan, Nigeria

**SSCE**, **Soundhope Private Academy** 02/2014 – 06/2020  
Lagos, Nigeria

## SKILLS

---

### Front-end Development — Expert

- **Languages & Markup:** HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Styling:** Tailwind CSS, Bootstrap
- **Frameworks & Libraries:** React.js, Next.js
- **UI Enhancements:** Framer Motion, Swiper.js, AOS (Animate on Scroll), Toast Notifications
- **SEO Tools:** Sitemap generation

### Database Management — Expert

**DBMS:** MongoDB (Non-Relational), Mongoose ODM

### API Development & Integration — Expert

- **RESTful API Design & Development**
- **API Integration** (3rd-party & internal services)

### State Management (app progress tracking)

— Expert

Context API, Zustand, Redux

### Back-end development — Expert

- **Languages & Runtime:** Node.js, JavaScript, TypeScript
- **Frameworks & Tools:** Express.js, JWT (JSON Web Token), Bcrypt.js, Swagger (API Docs)

### Authentication & Authorization — Expert

- **Third-Party Auth Tools:** Passport.js, Clerk, Firebase Authentication
- **Secure Practices:** JWT-based auth, OAuth flows

### Version Control — Expert

Git & GitHub (branching, commits, merging, basic CI/CD workflows).

Git & bitbucket(atlassian)

INTERESTS

Software Engineering	Learning Foreign Languages	AI (machine learning)
<ul style="list-style-type: none"><li>• Passionate about studying software engineering, staying updated on new technologies, and exploring innovative solutions to complex problems.</li></ul>	Enthusiastic about learning new languages, as it helps me connect with diverse cultures and improves my communication skills in global collaborations.	

AWARDS

Outstanding Developer Award, Codar Institute	18/09/2024
--	------------

ORGANIZATIONS

<p><b>CLOUD ETHUSIAST</b>, <i>Software developer (full-stack web)</i> </p> <p>My efficiency as a developer and the value I consistently delivered earned me a full-time position as a staff developer from being an intern. I've contributed to building and deploying both <b>static and dynamic websites</b>, as well as full-scale <b>web applications</b> tailored to client and organizational needs.</p> <p>Throughout my role, I've successfully <b>integrated multiple APIs</b>, implemented <b>authentication systems</b>, and built responsive user interfaces with performance and user experience in mind. I'm a strong team player — always ready to <b>collaborate, fix bugs</b>, and assist others in resolving complex issues during development cycles.</p> <p>One of my proudest achievements is developing a fully functional <b>elaborate application</b> from the ground up, showcasing my full-stack capabilities. With more projects already in motion, I continue to improve systems, share knowledge, and drive innovation across the team.</p>	<p>08/2023 – present Quebec, Canada</p>
<p><b>Bloomy Technologies</b>, <i>Senior Instructor - Web development</i> </p> <p>As a Coding and IT Instructor, I've been responsible for teaching foundational to intermediate programming skills to aspiring developers. My teaching style is hands-on, efficient, and uniquely tailored to simplify complex concepts — allowing students to grasp technical topics quickly and confidently.</p> <p>I'm especially known for my <b>ability to debug code and resolve issues in real time</b>, which has earned me strong trust and respect among my students. They consistently rely on me for technical clarity and guidance, whether they're stuck on a logic error or building out full-stack projects.</p> <p>This role has also sharpened my own skills. My <b>problem-solving approach</b> allowed me to take on and <b>effectively teach SQL</b> classes — mastering relational database concepts and SQL queries through live demonstrations, troubleshooting student challenges, and guiding practical data exercises.</p>	<p>Lagos, Nigeria</p>

## CERTIFICATES

---

### **Certificate of Completion (Codar Institute)**

This certification demonstrates  
my ability to  
design, develop, and deploy  
complete web  
applications, ensuring high  
performance and  
reliability across various  
platforms.
