PROFILE

I'm **Abdul**, Passionate Frontend Developer skilled in building high-performance, scalable, and visually engaging web applications using **React.js**, **Next.js**, and **TypeScript**. I'm driven by the craft of translating design and logic into seamless user experiences that feel intuitive and modern. With strong attention to detail, clean coding practices, and a problem-solving mindset, I bring both creativity and technical precision to every project.

EDUCATION

B.Sc. (In Progress) – Software Engineering, Babcock University ↗

2025 – present

Ogun state, Nigeria

SSCE, Soundhope Private Academy

02/2014 – 06/2020

Lagos, Nigeria

SKILLS

Frontend Technologies — Proficient

- React.js
- Next.js
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3
- SASS

State & Data Management — Competent

- Redux Toolkit
- Context API
- React Query
- Local Storage
- RESTful API Integration
- Axios
- Fetch

Performance & Optimization — Proficient

- Code Splitting
- Lazy Loading
- Image Optimization
- Caching
- Lighthouse Auditing
- SEO Optimization
- SSR/SSG (Next.js)

Testing & Quality Assurance — Competent

- Jest
- React Testing Library
- Debugging Tools (React DevTools, Chrome DevTools)

Design & Prototyping — Competent

- Figma
- Adobe XD
- Design System Implementation
- Component Reusability

AI Integration — Proficient

- Building **AI-powered chatbots, analyzers, and interactive features** for web apps.
- Experience integrating **Vercel AI SDK**, OpenAI API, Google generative AI, Grok and other machine learning services.
- Implementing real-time AI responses, user behavior analysis, and dynamic content generation.

UI & Styling — Proficient

- Tailwind CSS
- Material UI
- Styled Components
- Framer Motion
- GSAP (Greensock Animation)
- Responsive Design
- Accessibility (a11y)

Authentication & Authorization — Proficient

- Firebase Authentication
- Clerk
- Passport.js
- JWT-based Auth
- OAuth 2.0
- Secure Token Flows

Version Control & Collaboration — Expert

- Git
- GitHub
- Git Flow
- Jira, Trello
- Slack
- Agile Workflows

Build & Deployment — Proficient

- Vite
- Webpack
- npm/yarn/bun
- CI/CD (Vercel, Netlify)
- Environment Management (.env)

Soft Skills — Competent

- Problem-solving
- Detail-oriented
- Strong communication
- Team collaboration
- Adaptability
- Continuous learning mindset

Payment Integration — Competent

- Implementing secure, client-side **payment flows** using **Stripe**, **Paystack**, and similar gateways.
- Handling transactions, webhooks, and order/transaction tracking.
- Ensuring seamless integration with frontend interfaces and backend APIs.

INTERESTS

Software Engineering

- Passionate about studying software engineering, staying updated on new technologies, and exploring innovative solutions to complex problems.

Learning Foreign Languages

Enthusiastic about learning new languages, as it helps me connect with diverse cultures and improves my communication skills in global collaborations.

AI (machine learning)

ORGANIZATIONS

Bloomy Technologies, Senior Coding & IT Instructor (Frontend-Focused) ☈

As a Coding and IT Instructor, I teach students core web development skills from HTML, CSS, and JavaScript fundamentals to React-based frontend development. My teaching approach is practical and beginner-friendly, helping students understand real-world use cases and build functional interfaces.

I'm known for breaking down complex frontend concepts into simple explanations and debugging issues live during sessions, which has earned me strong trust from my students. They depend on me for guidance with UI logic, component structure, state management, and general problem-solving in their projects.

Teaching has also sharpened my own development skills. While assisting students across various challenges including basic NoSQL concepts, I've strengthened my ability to explain technical ideas clearly, think through problems quickly, and support learners as they build complete frontend applications.

04/2025 – Present
Lagos, Nigeria

CLOUD ETHUSIAST, Software developer (frontend-development) ☈

I started as a frontend development intern, and due to the quality of my work, consistency, and speed of delivery, I was promoted to a full-time frontend developer. In this role, I contributed to building and deploying responsive, high-performing web applications using React.js and Next.js.

I worked closely with designers and backend developers to translate requirements into clean, efficient user interfaces. I integrated APIs, implemented authentication flows using tools like Firebase and Clerk, optimized components for performance, and ensured seamless user experiences across devices.

Beyond feature delivery, I actively participated in debugging, code reviews, and team collaboration. I also took ownership of key features from scratch including developing a complete, production-ready application interface which showcased my ability to handle complex UI logic, state management, and scalability.

I continue to focus on improving UI/UX, enhancing frontend architecture, mentoring teammates when needed, and contributing to an efficient, innovation-driven development environment.

08/2024 – 09/2025
Quebec, Canada

FREELANCE FRONTEND DEVELOPER, Self-Employed - Remote

- Designed and developed responsive, high-performing user interfaces using **React.js**, **Next.js**, **TypeScript**, and modern UI libraries.
- Translated client requirements into clean, accessible, and scalable component architectures.
- Integrated **payment systems (e.g., Paystack/Stripe)** into frontend flows, ensuring smooth and error-free user payment experiences.
- Implemented authentication flows using **Clerk**, **Firebase Authentication**, and JWT-based logic from the backend.
- Collaborated with backend developers and UI/UX designers to deliver seamless product experiences.

2025 – Present
Remote.

- Optimized performance through code splitting, lazy loading, memoization, and efficient state management.
- Delivered multiple production-ready client applications, ensuring timely delivery, high quality, and consistent client satisfaction.

CERTIFICATES

Certificate of Completion

(Codar Institute)

This certification demonstrates
my ability to
design, develop, and deploy
complete web
applications, ensuring high
performance and
reliability across various
platforms.
